

**Position: .NET Software Developer**  
**Full Time –Mid Level-Exempt**  
**Position No. 11.1.7**

**Job Responsibilities:**

As a member of the application development and support teams, an ELI developer both maintains software applications in ELI's Laboratory Information Management System as well as develops new applications for integration with ELI's core systems. This position will be based out of our corporate headquarters in Billings, MT; infrequent travel to other lab locations may be required.

**Essential Job Functions:**

- Develop custom logic for new applications to enable ELI's business
- Support existing applications through troubleshooting and issue resolution

**Qualifications:**

**Required Skills:**

- Fluency with Visual Studio, Microsoft development tools and MS SQL Server
- Solid understanding of object-oriented programming and relational database design and development

**Desired Skills:**

- Competency in one or more of the following languages: C#, ASP.NET, XML, JavaScript.
- Experience working as a team member and desire to be a team player
- Critical thinking and problem solving skills
- Solid written and verbal communication skills
- Bachelor of Science in Computer Science, MIS or related discipline
- Development background in MS Access/VBA and integration with Microsoft Office products.

**Compensation:**

ELI provides a full benefits package including Health, Life, Long Term Disability Insurance and Flexible Spending Accounts. Competitive wages are offered as well as other compensation provided thru Profit Sharing, and Employee Stock Ownership Plan.

Qualified individuals interested in this career opportunity should email a current resume with salary requirements to the Director of Human Resources for Energy Laboratories at [bburris@energylab.com](mailto:bburris@energylab.com). Please do not call.

Relocation is not provided for this position.
