

Position: Hazardous Waste Analyst
Full Time-Nonexempt
Position Number: 1.4.3.1

Analytical Lab in Billings, MT has an opening for a chemist in its Hazardous Waste Laboratory. This is a very successful laboratory with over 60 years of providing analytical services to the extractions industry as well as municipalities, state and federal government agencies, and the private sector.

Job duties would consist of, but not limited to, receiving samples, sample preparation for analyses, sample analysis, and sample management. The successful candidate will be required to perform various environmental sample analyses including waste characterization- including ignitability, corrosivity, reactivity, and toxicity. Digestion of soil and solid waste for mercury and other metals. Percent solid and volatile solid determination.

Successful candidate must have aptitude to operate laboratory equipment, LIMS program, and accessing company network. Other routine laboratory duties will be involved. Must be able to communicate with other department level experts on technical questions or issues that may arise. Must be able to follow strict laboratory protocol, be dependable, self-motivated, detail oriented and work well in a team atmosphere.

Educational requirements are BS/BA in Chemistry/Biology or other science related field or significant laboratory experience in the private sector.

Salary range is depending on skills, knowledge and abilities with the potential for wage growth with excellent job performance. A full benefits package including Health, Life, Long Term Disability Insurance and Cafeteria Plan is included. Additional compensation packages include Profit Sharing and Employee Stock Ownership Plan.

Qualified individuals should submit a current resume with salary requirements to Human Resources, Energy Laboratories, Inc, P.O. Box 30916, Billings, MT 59107. Interested parties may also visit our job listing posted on [Indeed](#) or at our website at www.energylab.com to submit an application.
